

ZHENGXIN CO.,LTD

 ZhengXin

Introduction

We guarantee excellent raw materials with reasonable price.

ZHENGXIN CO., LTD

has its HQ in Hong Kong,
and was established in order to insure global
trade with a better quality service.

We import and export a wide variety of major
raw materials, going from powder to doré bar,
such as gold, Steel and copper. Those materials
originated from Hong Kong, Ghana, Germany,
Australia, Taiwan, etc.

Through a systematic, secured courier network
and professional partners, we assure a sure
delivery of your precious raw materials to their
destination.

About ZhengXin

History and Philosophy

~2017

- Establishment of 'SRX Korea' in 2011.
- Import and export of raw materials in the chemical sector
- In January 2014, establishment of a branch in Frankfurt, Germany.
- Imports of rare minerals and re-exports to third countries

2018

- MK Holdings and M&A
- Strengthening China and European Trade
- Investment in renewable energy
- Corporate Management and Marketing Business

Global Zheng Xin is under the plan of establishing a gold refinery in Dubai in 2021. The setting up of refinery will enable us to provide our client with 4/5N gold bullion.

About ZhengXin

We have ...

Employees

- Gold business experts
- Import-export experts
- Trade experience

Capital

- Cooperative company

Specialist

- Formation of expert advisory committees in each field
 - Market trends experts from all over the world
- Configuration of a highly competent Risk Hedging Team

About ZhengXin

Professional Executives

Development Department

- Investigate mines and sign contracts in conjunction with consulates
- Discover trading lines

Marketing Department

- Distribution channel management
- Analyze the market environment and establish sales strategies

Trade Department

- Safety brokerage trade
- On-site survey and physical verification of transactions

OUR SOLUTION

ZHENGXIN has as principle to provide high quality raw materials that customers need, on time and at regular intervals.

Having partnership with major banks such as City bank and KDB, IBK, we maintain a cooperative relationship with special delivery companies specialized in cash and precious metals (BRINKS, G4S), as well as with special smelting and analysis companies (**HERAEUS, METALOR, KMR**).

This enables our trustworthy transaction to our valued customers.

Our Service is for Premium Raw Materials

The 25 years of experience of our experts who collaborate with the best companies in the world, allow us to supply top quality gold of 4N(99.99%).

About ZhengXin

Representative Client

In ICI's World's Top 100 Chemistry ranking

- Exporting chemical raw materials since 2011
- Export Commodities: LED Fluorescent Raw Materials (Luteium, Erbium, Europium)
- Continuous and stable material export

- · Highest technology in LED fluorescent material production
- · Merge with L Tech,
- · Production of semiconductors and fluorescent materials
- · Export Commodities: LED Fluorescent Raw Materials (Luteium, Europium, LuAg Material)
- · Build trust in nine years of continuous trading

INTEMATIX

- Korea's leading consumer of precious minerals
- Leader of LED fluorescent tubes in Korea
- Export products: LED fluorescents, backlight units, flash LEDs, LEDs for vehicles
- Continuous transaction and trust relationship since 2014

SEOUL SEMICONDUCTOR

OUR OFFER

- GOLD

The gold we provide
is up to 99.999% of purity.

Gold is the representative of safety assets
and a heavy investment has drawn keen attention.

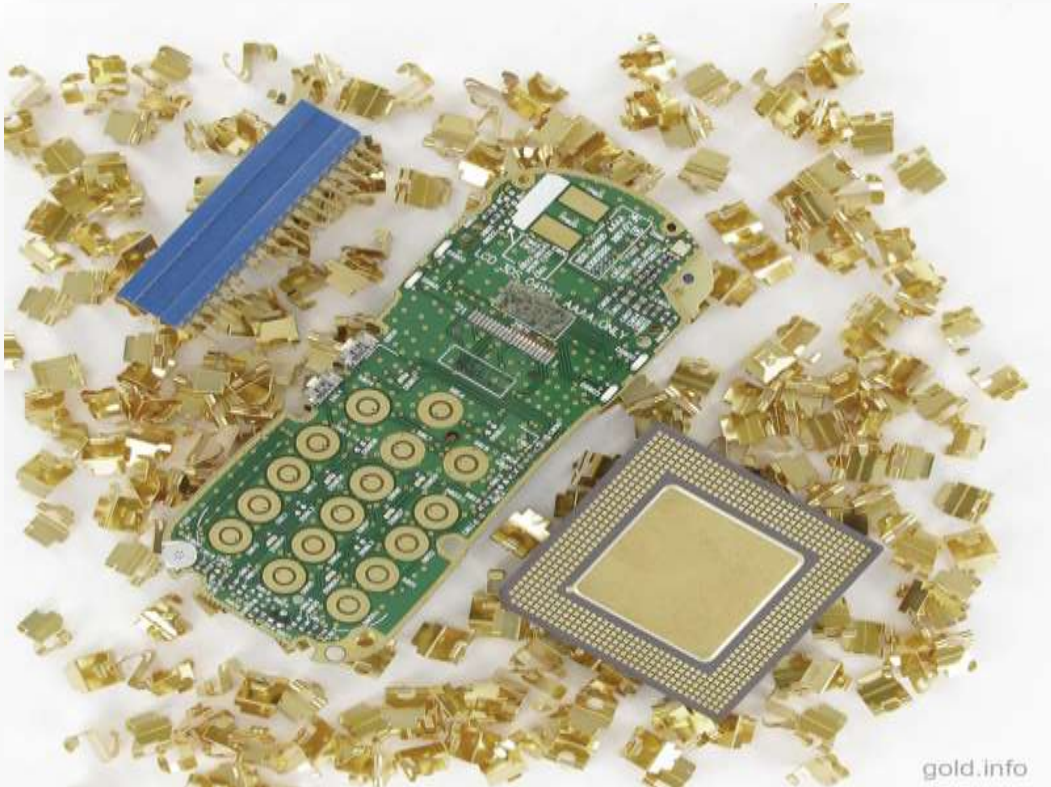

Gold sales are as high as gold purchases, so they
affect international sentiment and the environment.

That's why there is a preference for gold
investment and gold-futures.

Usage of GOLD

Electronic goods

Jewellery

Dental medicine

Offered Price

- Gold , Based on LBMA

Base on LBMA price

ZHENGXIN complies with the LBMA's gold trade guidelines and does not deal with any companies operating in crime or war zones.

Prices are also based on LBMA published prices.

LBMA Price trends over ten years

OUR OFFER

- Copper

The ultra-fine copper, we are providing is up to 5 N (99.999%) purity.

Usages of Copper:

- Automobile
- Electric
- Electronics
- Construction
- Shipping

due to its high thermal and electrical conductivity.

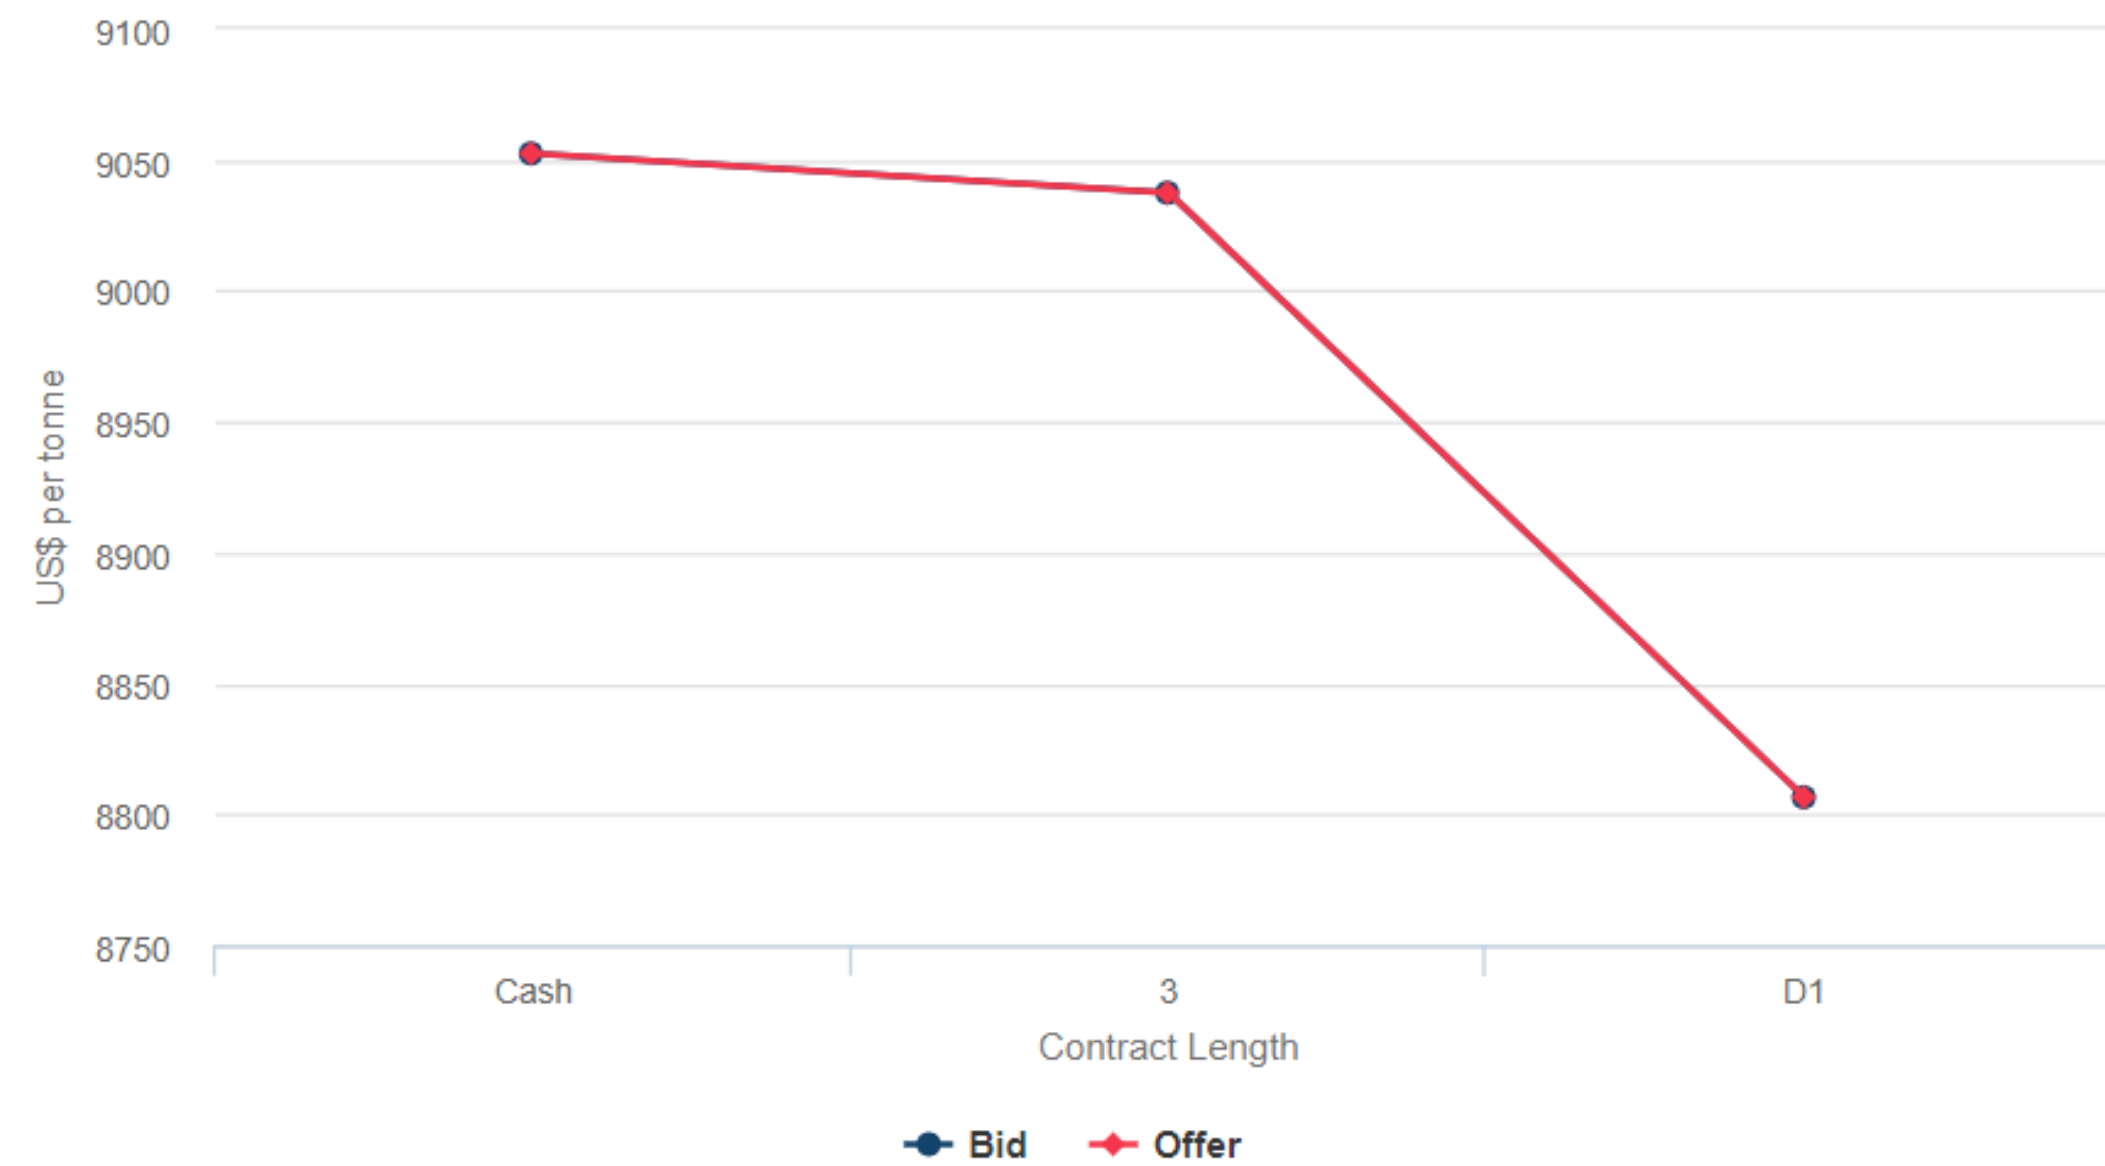

ZHENGXIN currently imports copper powder and we plan to gradually expand our imports to other copper products.

OUR OFFER

- Stainless Steel

SUS304 Stainless Steel

The most common form of stainless steel used around the world, due to its excellent corrosion resistance and value. It contains between **16 and 24 percent chromium** and up to **35 percent nickel**, as well as small amounts of carbon and manganese.

SUS316 Stainless Steel

The second-most common form of stainless steel. The key difference is that SUS316 incorporates **about 2 to 3 percent molybdenum**. The addition increases corrosion resistance, particularly against chlorides and other industrial solvents.

UTMOST VISION IN 2021

Our main goal in 2021 is to export gold as raw materials to U.S., Chinese and Japanese semi conductor producers which has higher barrier to the Asian company.

We also aim to diversify our businesses in other countries export of raw materials.

The United States, China, and Japan account for most of the world's gold use, and demand is high.

We're going to expand our sales outlets in these countries.

UTMOST VISION IN 2021

Our main goal in 2021

Global ZhengXin's main goal in 2021 is to set up a gold refinery in Dubai UAE , the city that is known to be one of the main hub for the global trading business in gold , and it will be located in JAFZA/DAFZA/KIZAD.

Based on our stable gold supply and network, we are expecting a production up to 26tons 4/5N bullion per year. After 2021, we believe Global ZhengXin's LBMA certified bullion would be provided and sold worldwide.

UTMOST VISION IN 2021

Our main goal in 2021

ZX Foundation:

Zhengxin Co., Ltd would like to return part of the profits generated thanks to our partners from African countries.

Starting November 2021, we are planning to establish a foundation focusing in providing waterless composting toilet systems in African countries.

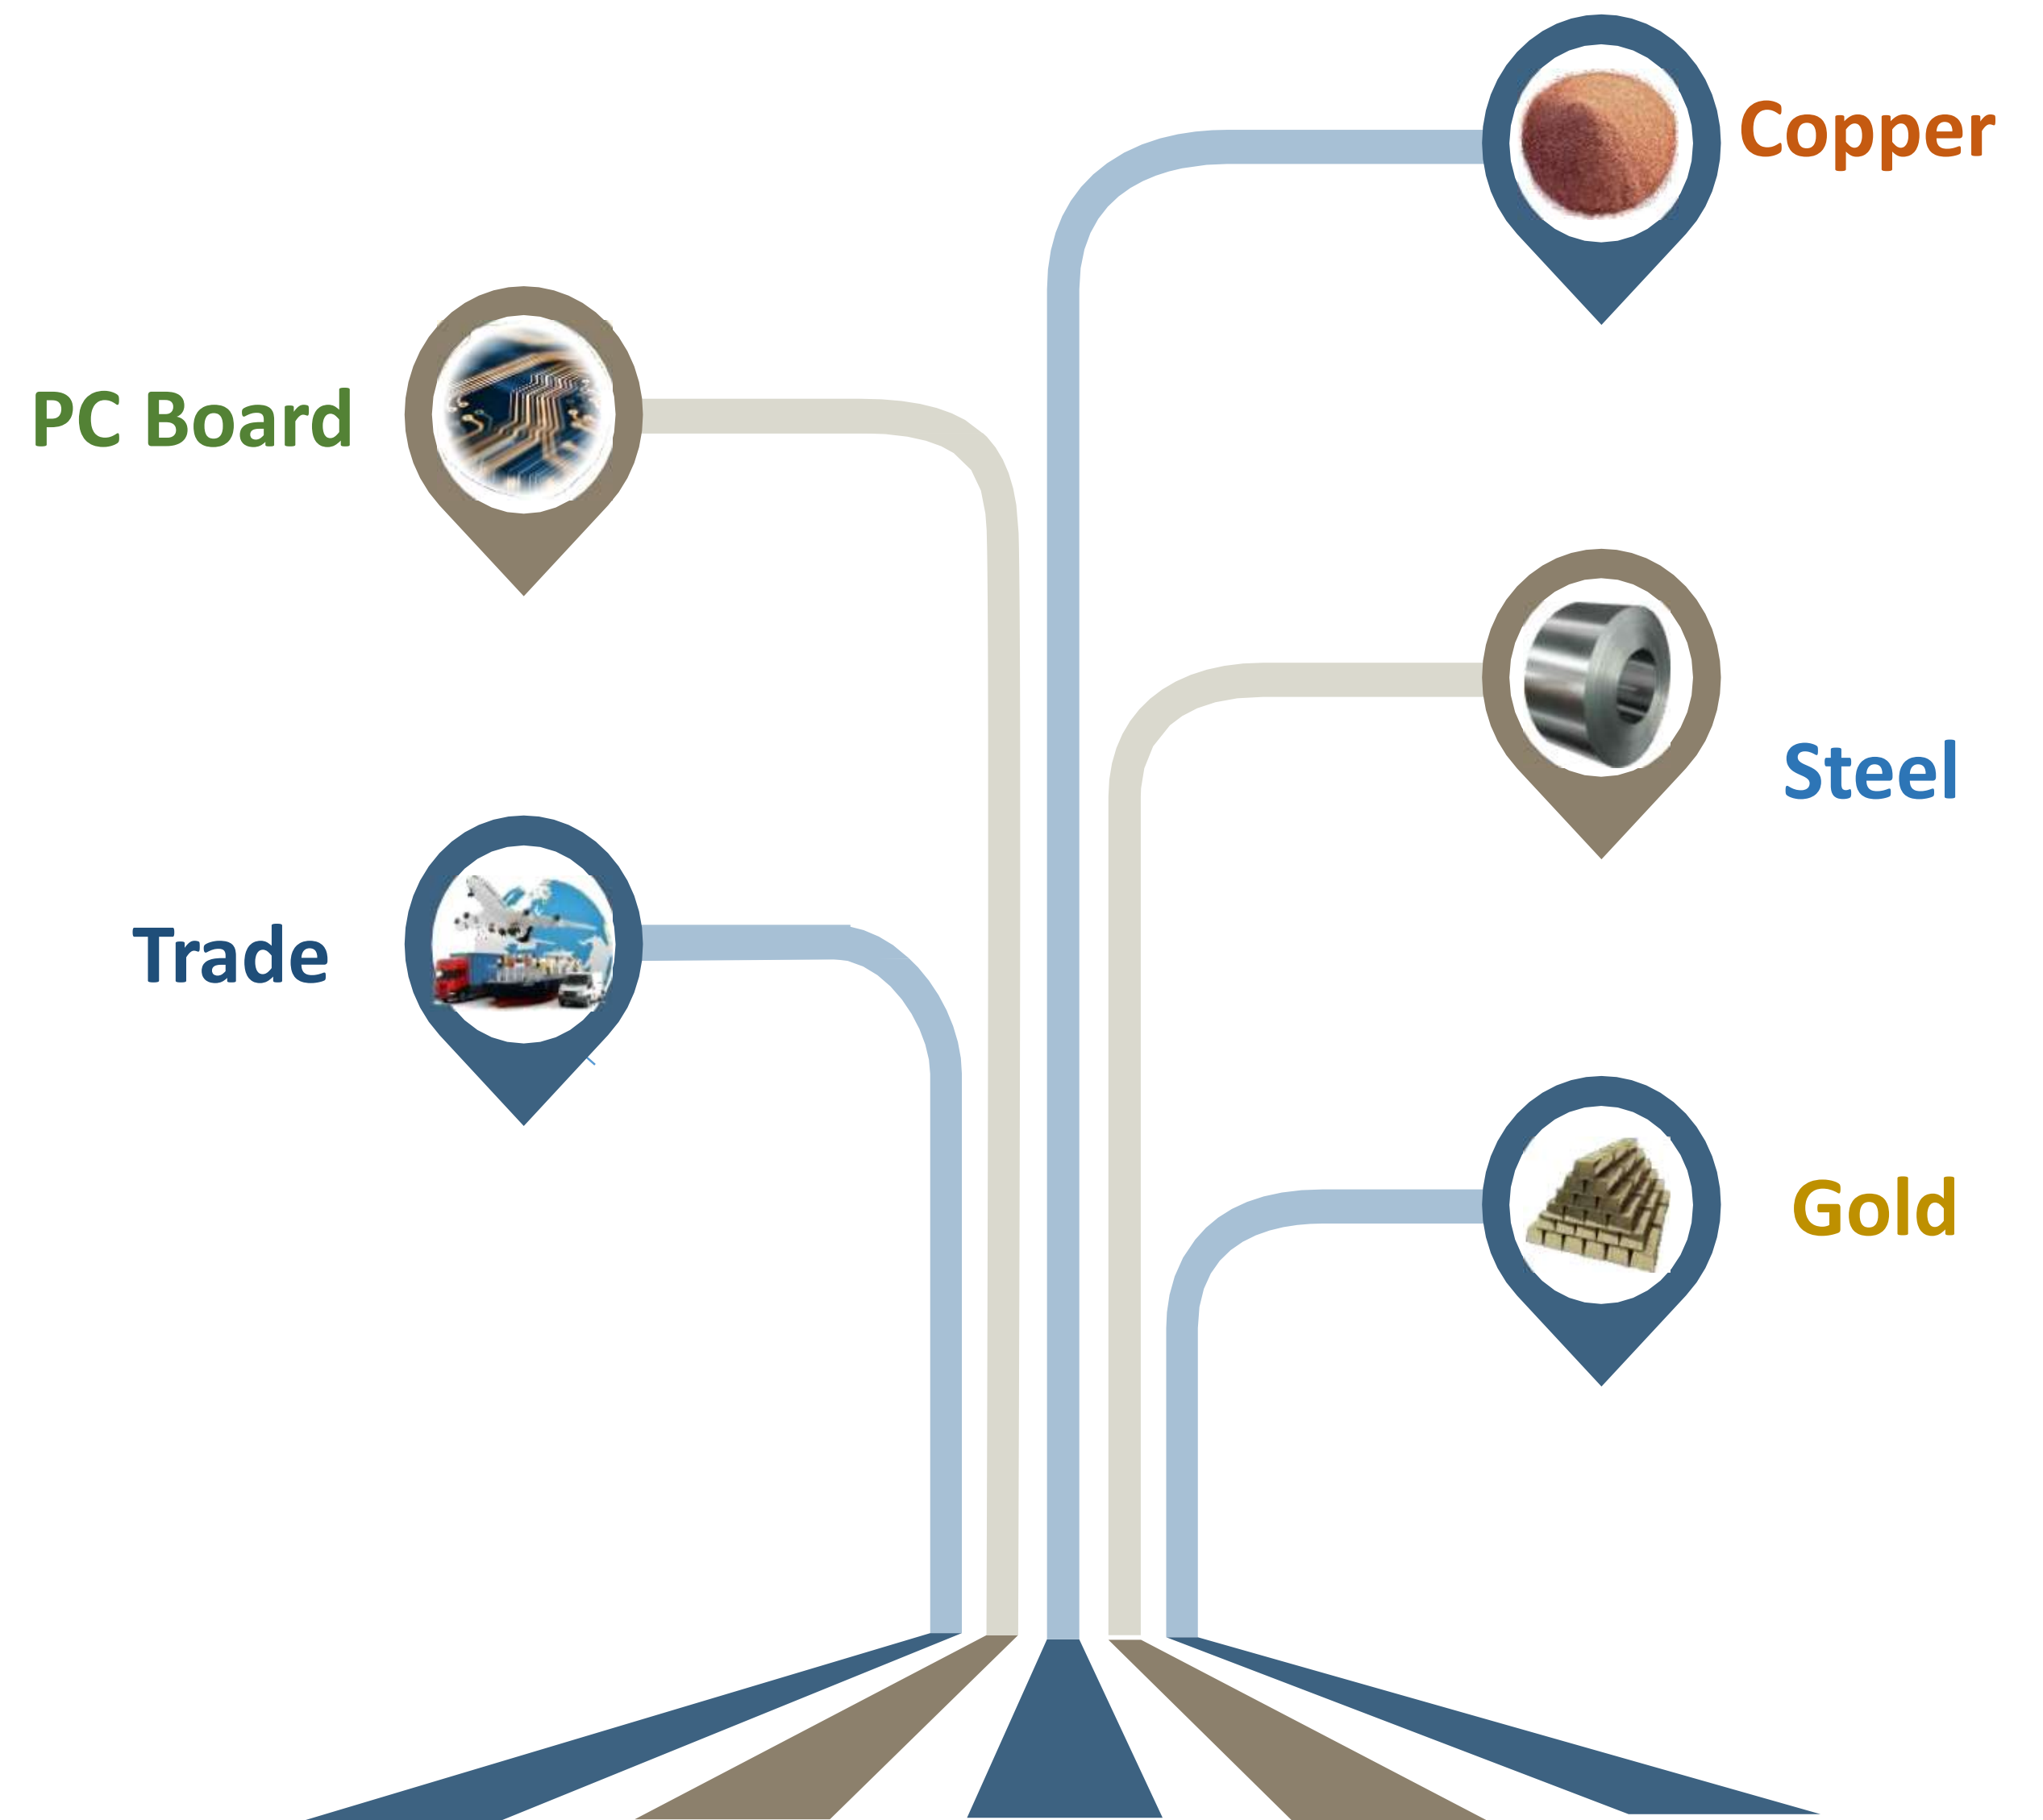

OUR POSSIBILITY

Some of the challenges we faced...

ZHENGXIN is currently working on various projects in Korea and Hong Kong. Despite many uncertainties and trust issues during the global pandemic period, Global ZhengXin has been consistently providing the best to our customers.

Through constant communication and efficient working pattern, Global ZhengXin manage to build strong trusting relationships with many customers.

Gold Dore Bar Processing

A process between mining and smelting, which is intended to enhance the quality of the metal components for the purpose, by using the differences in the physical properties of the minerals after crushing the glare.

The concentration ore has undergone the process of polishing has increased but still has not sufficiently removed impurities, so it has to undergo smelting to increase the purity further.

Crude Ore

1) Mineral Dressing

Concentrate Ore

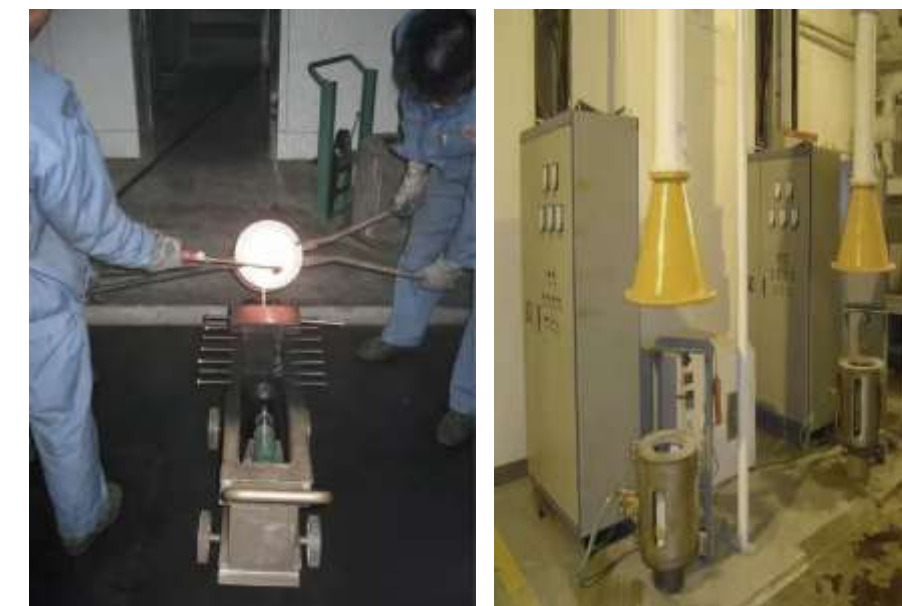

2) Smelting

Gold Dore

The ore that is as it is mined. (i.e. the ore sent to mineral dressing, including waste)

It is a high-quality mineral that is obtained by mineral dressing, in most cases, it is an ore that is refined enough to be used directly as a smelting or industrial raw material.

Gold Dore bar of 92% to 96% purity after all process of smelting

Global Zheng Xin's Gold Refinery

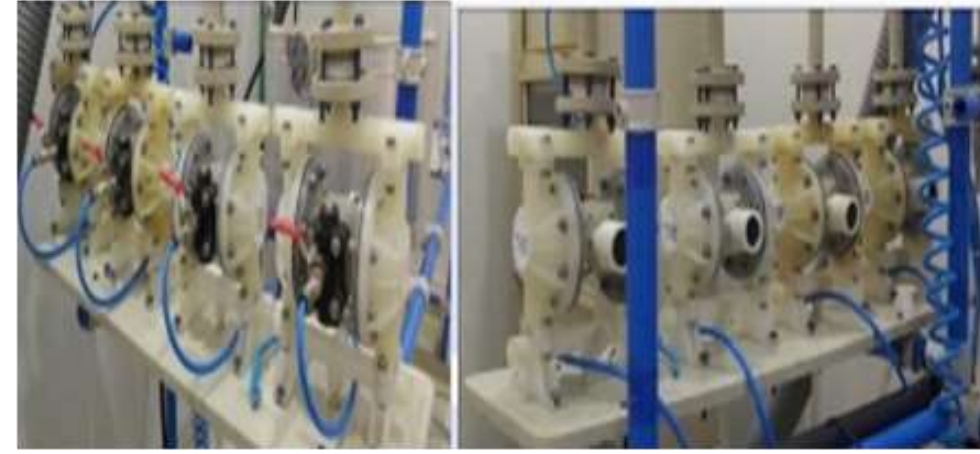

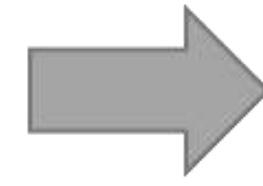

Global ZhengXin's gold refinery in Dubai will produce 4/5N gold bullion with the fully automatic plant system and we will try our best to equip all the machineries with eco-friendly system in order to lessen the damage to environment as much as possible. Global ZhengXin believe that environmental protection is an essential part for fulfilling the corporate social responsibility.

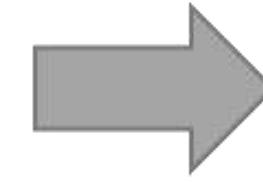

Global Zheng Xin's Gold Refinery Flow

92~96% of Dore Gold Bars

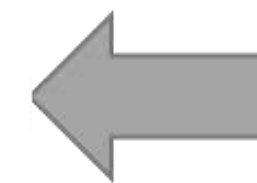

1. Acid Charging & Agitating

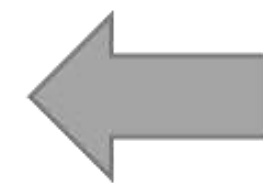

2. Scrubbing & Dissolution

3. Precipitation

4. Gold Electrolysis Refining

5. 4/5N Gold Bullion

OUR BUSINESS COOPERATIVE PARTNER

Heraeus

METALOR®

What you need to know

ZHENGXIN currently imports gold (Au), the essential raw materials in the semiconductor industry, copper(Cu), and steel from various industrial groups, and supplies them to secondary suppliers of global companies such as Samsung, LG, and TANAKA.

Here 's how

For the smelting of precious metals, up to 4 N can be obtained at the refinery of Metalor Group in Hong Kong, and so we offer the guarantee of great satisfaction on post-smelting quality.
